## NATURALS PALETTE

---

**The colors from our Naturals Palette have been carefully selected to support a therapeutic environment that helps reduce tension, assists in behavior modification and enhances the safety of both residents and staff.**

Research indicates that interiors with an interesting use of color that are not overly neutral can:

- Balance the mental equilibrium of residents
- Reduce behavioral discord
- Promote dignity and encourage socialization
- Create relaxing environments to enable rest and encourage faster healing
- In general, improve resident and staff morale

When applied with understanding and purpose, color can be used to promote self-confidence, uplift the spirit, soothe the psyche and be a positive distraction among residents. The colors in the Natural Palette have shown to address three primary human elements:

- Familiarity – A sense of connection with the outside world.
- Stress Reduction – Calming and lifting the human spirit.
- Morale Improvement – Humanizing and supporting a feeling of normality.

Each color option in the Naturals Palette is designed to work together to deliver a seamless transition from room to room and promote a sense of health, well-being and sustainability throughout the entire facility.

**TWILIGHT**

---

Peaceful, tranquil and thoughtful. A quiet lake, a distant mountain. A comforting neutral that partners well with others to create depth or act as a soft contrast. It promotes mental stability while relaxing the mind and body.

**COVE**

---

Crisp, cool and refreshing. Clear coastal skies, a calm marina. It's the perfect partner for all palettes. It stimulates clear thoughts and heightens concentration.

**CLAY**

---

Rustic, grounding and stable. The color of sundried soil, cocoa, and terra cotta. A foundational neutral that pairs well with other color options. It's warm, welcoming and inspires optimism.

**SAGE**

---

Organic, floral and natural. A morning dew, a foggy northern forest. A balanced tone that is an ideal complement to every color. Its calming properties help to diffuse anxiety and soothe the mind.

**SAND**

---

Timeless, everlasting and refined. The color of stone and rock. Subtle, yet strong, it allows other colors and materials to take center stage. It offers structure and strength.

**DOVE**

---

Reliable, practical and versatile. The color of feathers, pebbles, and weathered wood. A strong neutral with an honest voice. It conveys a sense of balance and stability.

## PATIENT ROOM

---

By incorporating natural colors and textures into patient rooms, facilities can establish an environment that fosters a healing atmosphere, enhances patient comfort, and supports the therapeutic process. Earthy greens, like Sage, help diffuse patient anxiety and soften their transition to a new environment. A warm, homelike atmosphere can be established by implementing furniture constructed using our unique TruGrain™ polymer formulation, a highly durable and easy to clean polymer designed to mimic the warmth of natural wood.

## WELCOMING & WAITING

---

A good first impression can set the tone for a patient's entire stay. The strategic use of design elements in welcoming and waiting areas, like the use of natural light, soothing colors and comforting textures, help to relax the mind and body. The incorporation of plants and natural wood tones creates a connection to nature that helps blur the lines between interior and exterior, reducing patient apprehension and agitation.

## VISITATION

---

A well-designed visitation area can improve the overall perception of the facility, both among visitors and within the broader community. The considerate use of color and the integration of organic artwork helps increase morale and reduces the potential for conflict. Access to natural light has been shown to improve mood and enhance well-being. Effective use of natural lighting also creates an opportunity to rely less on artificial lighting, which can save on energy costs and reduce the environmental impact of the facility.

## DAYROOM

---

As the area in which residents spend the majority of their waking hours, it's vital for dayrooms to closely reflect a normalized environment that mirrors life outside the facility. An open-plan concept that provides multiple settings for use throughout the day can help support residents on their journey towards rehabilitation while still maintaining high levels of safety, security and cleanliness. Earthy greens, neutral accents and simple pattern flooring help to promote a calm, relaxed environment.
